

INTRO

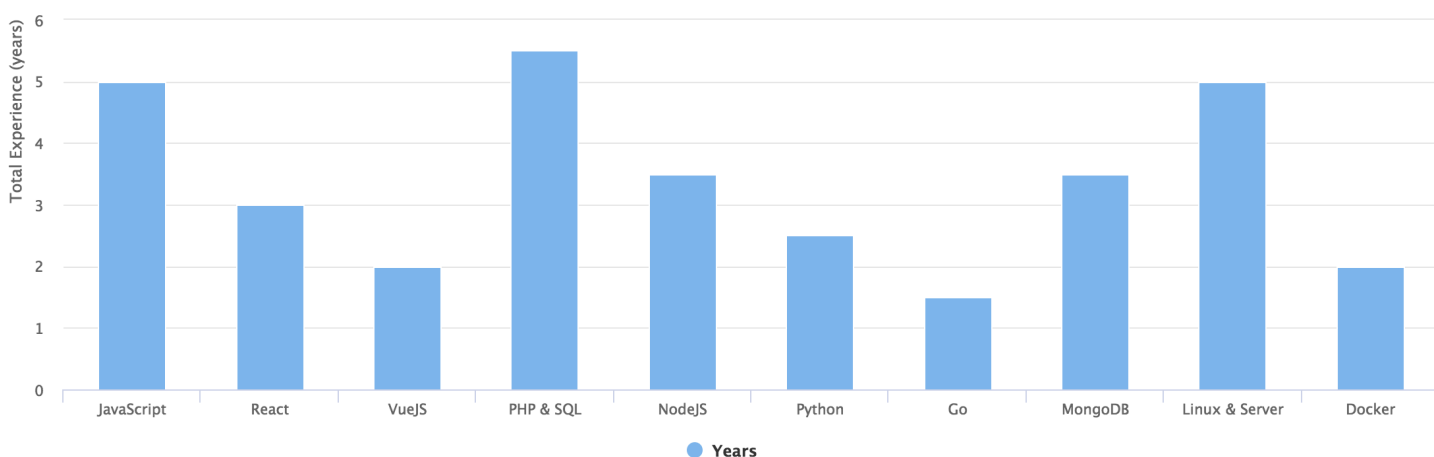

Hi

My name is Rendy Febry, 27 years old. I am full stack software developer based on Bandung, Indonesia.

A Bit About Me

- More than 6 years career in software development within almost 10 years of experience in IT industry
- Main skills: JavaScript both in frontend and backend, with multiple frameworks like React, Vue, Express, etc. Another backend language like Python & Go. Database management with MongoDB & SQL. DevOps skills like CI/CD, Docker, Linux, etc.
- Leading experience: 1 year as Head of Software Engineering, managing 15 people.
- Currently learn about kubernetes and other DevOps technology.
- Curiosity & Self Learning attitude lead me to always learning and explore something new things.
- Frequently attend workshops & meetups about software and technology.

Years of Experience

PIXEL HOUSE STUDIO

Nov, 2016 - Present

Pixel house is advertising company based on Bandung Indonesia. We build multiple web app to help our user create their ads more efficiently. At the end of 2017, Managix the software that we build nominated to be official Facebook Marketing partner. And in the 2018 we invited to Facebook office in Singapore to discuss more about the partnership program.

Head of Software Engineering

Nov, 2017 - Present

- Lead our Software Engineering Team
- Migrate old front end app to VueJS
- Develop Backend service with Python, NodeJS and Go
- Design & optimize MongoDB database & server, alongside with ELK stack for logging & monitoring
- Server and Deployment with Docker, Gitlab-CI, Kubernetes, etc

Senior Software Developer

Nov, 2016 - Oct, 2016

- Develop Front-end application with ReactJS, Vanilla JavaScript, and Laravel
- Build back-end service with NodeJS & Python
- Data & webpage scraping with PhantomJS
- Prepare automated deployment system with Jenkins
